

ClearMaxx — Subscription Pricing

Competitor pricing benchmark, recommended tiers, and the conversion strategy to maximize revenue from a TikTok-driven audience.

AI Skin & Face Scanner • Market: US • Prepared June 17, 2026 • Audience: Gen Z & Millennials

1 — Competitor Pricing Benchmark

App	Price	Model	Aggressiveness
GlowScan AI	\$8.99/mo or \$24.99/yr (3-day trial)	Freemium hard paywall	Medium
MDacne	\$24/mo (~\$288/yr) + \$9 trial	Subscription + product kit	High
Curology	\$4.95–\$39.95 / shipment	Rx + product subscription	High
Skinmax / Umax-style scanners	\$4.99–\$6.99/week or \$29.99–\$69.99/yr	Weekly paywall after 1st scan	High
Industry norm (AI scanner)	Weekly \$4.99–6.99 • Yearly \$39.99–69.99	Free scan → paywall full report	Medium

Takeaway: The consumer AI-scanner category lives on **weekly paywalls** (impulse buys from social traffic) anchored against a discounted **annual** plan. Avoid MDacne/Curology's product-bundle model — it's expensive and kills impulse conversion.

2 — Recommended ClearMaxx Tiers

Free	Weekly	Yearly	Lifetime
\$0	\$5.99 /wk	\$39.99 /yr	\$79.99
The hook	Impulse / social traffic	= \$0.77/week • 3-day free trial	One-time
✓ 1 full face scan	✓ Unlimited scans		✓ All Yearly features
✓ Overall ClearScore			✓ Forever, no renewal

- ✓ Basic issue preview
- ✓ Limited routine

- ✓ Full report + heatmap
- ✓ AM/PM routine
- ✓ Progress tracking

- ✓ Everything in Weekly
- ✓ Trigger/cause engine
- ✓ Ingredient scanner
- ✓ AI skin coach
- ✓ Glow-up share cards

- ✓ For commitment-averse users

3 — Conversion Strategy

1. **Soft paywall:** let users complete their *first* full scan free — the "wow" moment — then paywall the detailed report, routine, and tracking.
2. **Anchor weekly against yearly:** always display "\$5.99/week" beside "\$39.99/year (\$0.77/wk)". The contrast makes annual feel like a steal and lifts annual mix.
3. **3-day free trial on the yearly plan only** — drives trial starts; reminder push on day 2 reduces churn.
4. **Default-select the yearly plan** on the paywall (higher LTV, lower refund/churn than weekly).
5. **Use RevenueCat** to manage trials, pricing experiments, and App Store + Play subscriptions without backend work.
6. **Run price A/B tests** post-launch (\$4.99 vs \$5.99 weekly; \$39.99 vs \$49.99 yearly) to find the revenue-maximizing point.
7. **Win-back offer:** 50% off yearly to lapsed/cancelled users.

Projected positioning: At \$39.99/yr ClearMaxx undercuts MDacne (\$288/yr) and GlowScan's annualized cost, while matching category norms on the weekly impulse tier — competitive on price *and* superior on features (all-four-pillars + cause engine).
